**" Cutting Edge
Technology Solutions
For Your Growing
Business Needs "**

Microclouds helps rapidly growing companies with technology solution that improves their efficiency profitability and security posture in a streamlined way so they can focus on product development and growth

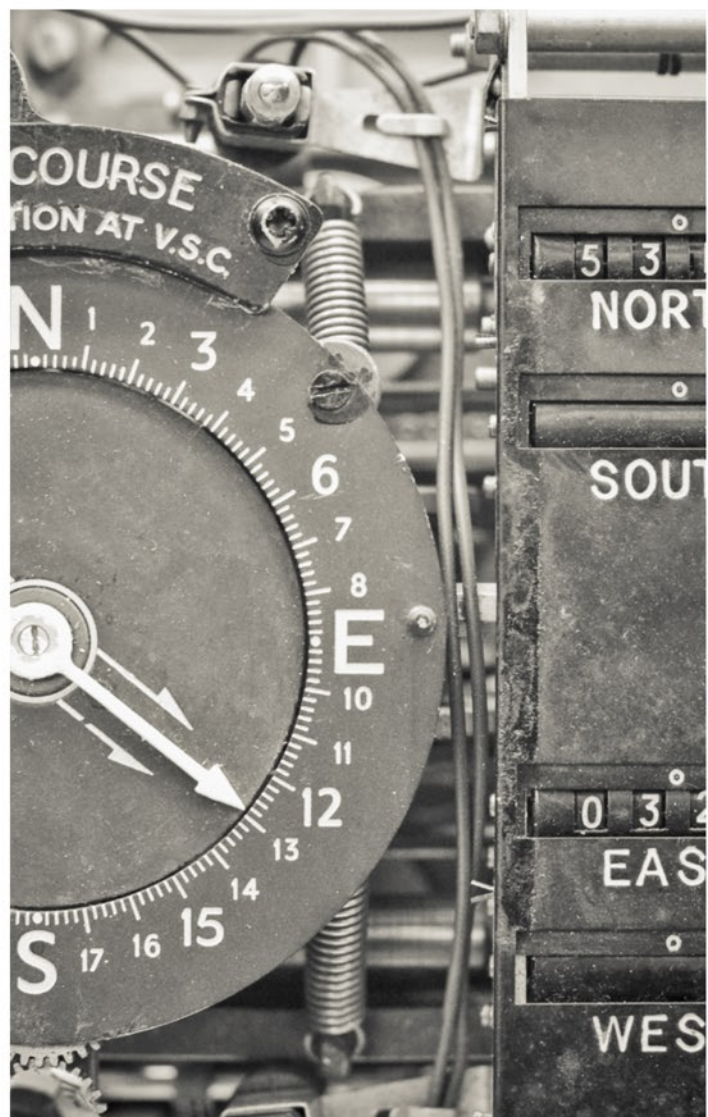

Founder's Statement

The Microclouds team takes the meaning of corporate responsibility to a new level. While the focus of many software vendors is the customer, and accordingly, his or her sales dollars, the Microclouds team upholds the highest level of integrity. Each employee at Microclouds is genuinely concerned with the well-being of our customers. I've witnessed our Engineering team go out of their way to add a newly requested feature to an upcoming release in order to accommodate the needs and requests of our clients. I've also seen our support and engineering team, which is significantly smaller than tech support squads working for conglomerates such as Microsoft, happily spending hours on the phone with clients just to make sure they are thorough in addressing any concerns and issues our customers come across. In fact, often these issues are not technical related questions, and our committed support team is more than willing to do extra miles to solve your issues as exactly what you expect from them--provide you with the best support capable.

Our desire to better the overall customer experience with our technology services is unconditional. Our team is selfless and always searching for new ways to innovate and improve our technology services and your experience with it. Over the course of the year, we will continue to release new versions of our software's and hardware that each seek to accomplish the overall goal of making your life easier, more intuitive, and the best it can be.

We are truly looking forward to our continued work with you and the opportunity to demonstrate ourselves as vendors. If you ever have any suggestions, comments, or concerns that aren't addressed on our website, please always feel free to share your thoughts with us.

Adheesh Thalekkara
Founder & CEO

About Our Company

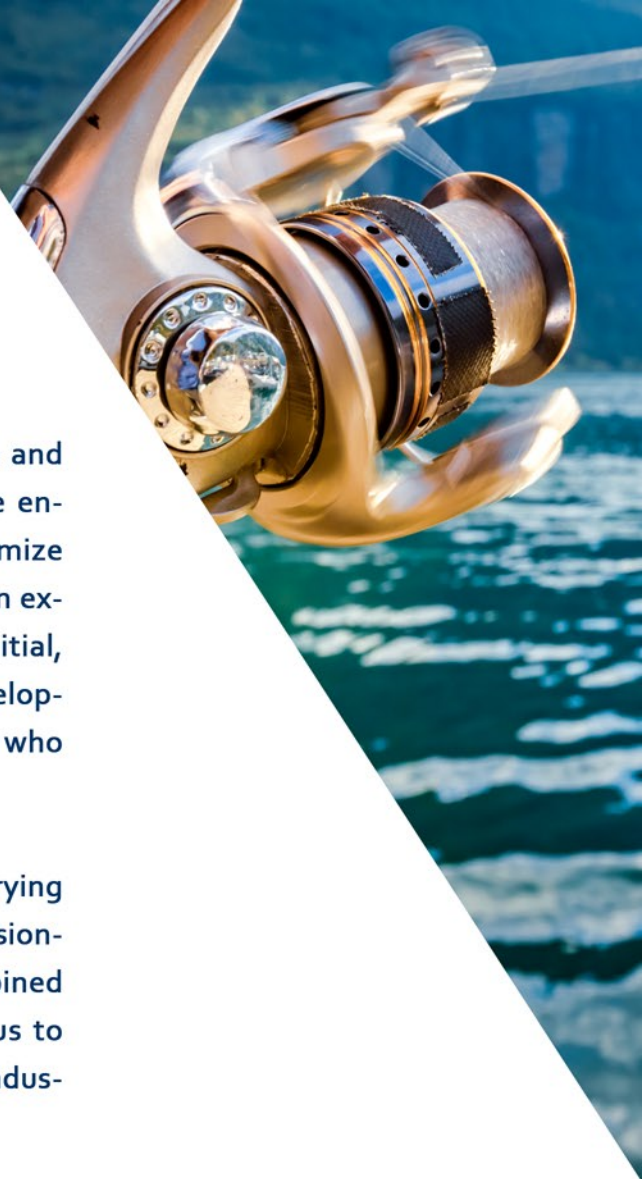

We microclouds are one of the india's leading software and technology company. our experience and infrastructure ensures that the technology we design, develop and optimize exceed our client's expectations. We also firmly believe in excellent communication with our clients. From an initial, no-obligation consultation with one of our business development managers, to your assigned technology designer – who is always just a phone call away.

At microclouds we have over 50 employees from varying backgrounds and disciplines who are dedicated and passionate about the services we offer to our clients. Our combined expertise and knowledge means that you can rely on us to ensure that your project is completed to the highest of industry standards.

Our Vision

The world is changing all around us. To continue to thrive as a business over the next ten years and beyond, we must look ahead, understand the trends and forces that will shape our business in the future and move swiftly to prepare for what's to come. We must get ready for tomorrow by today. That's what our 2030 Vision is all about. It creates a long-term destination for our business and provides us with a "Roadmap" for winning together with our technology partners.

Also we will continue to focus on the technology changes with commitment to learn them and continue to adapt it to our daily work life to full fill our great dream of a reset were earth will be enriched to a heavenly prosperous future.
